# MOTOCROSS

From the beginning, we have always worked to create the best riding experience. From the early days of modifying suspension and making custom gear for our team riders, it has always been about improving the experience. As we launch our MX20 collection, our passion to equip and inspire our communities to experience the best ride ever has never been stronger. Whether hammering laps at the track or exploring a new trail, its all about the experience. Fox is **MADE FOR YOU**.

# HELMETS

Since the launch of our first helmet in 1997 we have been driven to push helmet technology to new levels. The release of our all new innovative V3 with exclusive features like Fluid Inside™, MVRS and CAGE™ construction, the V3 set a new level for premium helmet performance in MX19. MX20 marks the launch of our all new V2 helmet. Adopting key features such as Fluid Inside™, MVRS and Varizorb, the V2 sets a new standard in its class. Combined with our V1, the Fox helmet family sets a new standard at all levels.

# THE MOST RELIABLE IMPACT PROTECTION SYSTEM

## FLUID® POD MATRIX

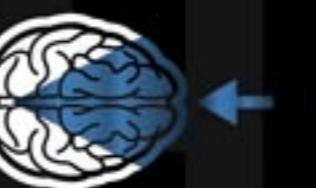

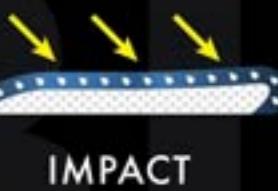

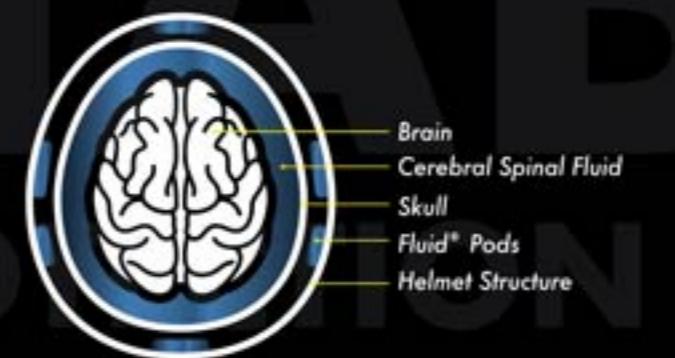

Fluid® incorporates a matrix of pods oriented around the head and attached to the helmet interior.

By precisely decoupling or "floating" the helmet on the head, each Fluid® pod matrix acts like CSF (Cerebral Spinal Fluid) to manage linear and rotational forces acting on the soft brain tissue.

At the moment of impact, the foam compresses to provide added low linear impact protection. Simultaneously, low shear fluid is dispersed throughout the pod creating a low shear plane that permits motion of the helmet relative to the head to provide rotational force protection.

"FLUID® TECHNOLOGY IS THE MOST RELIABLE AND RESPONSIVE IMPACT MANAGEMENT SYSTEM IN ALL THE CONDITIONS WE'VE TESTED."

According to the Neurotrauma Impact Science Lab (NISL) - a world-leading research facility for the study of sport related head injury.

### V3 HELMET

S | M | L | XL | RRP: R9999.00

- The first helmet with two rotational management systems: Fluid Inside™ and MVRS™
- All new Fluid Inside™ is designed to help dissipate rotational and linear energy transmitted to the rider's brain in the event of a crash
- Second Generation Magnetic Visor Release System (MVRS)™. Redesigned with more roost resistance and refined release control to help mitigate external rotational forces
- Dual density Varizorb™ EPS liner is meant to provide improved protection by spreading the forces of impact across a wider surface area
- Patent-pending chin bar/eye port CAGE™ is intended to improve energy management in the event of an impact
- MCT (Multi Composite Technology) Shell construction that blends Carbon and FRP resins to provide a light yet rigid external shell
- 4 shell and EPS sizes for best in class fit
- Injected Mesh vent screens provide superior ventilation and airflow, while maintaining protection from dirt and debris
- Removable, washable X-Static® comfort liner and cheek pads are antimicrobial and manage odor while wicking moisture away from the head
- Meets or exceeds DOT and/or ECE 22.05 standards

# V2

PROTECT WHAT MATTERS

## TARGETED AIRFLOW

11 intake and 4 exhaust vents for optimum airflow

## FIT

4 shell and EPS sizes for best in class fit.

## SHELL

Lightweight injection molded polycarbonate & ABS shell construction disperses energy in the event of a crash

## MVRS

Magnetic Visor Release System (MVRS) releases in the event of a crash

## VARIZORB

Dual density Varizorb™ EPS liner is meant to provide improved protection by spreading the forces of impact across a wider surface area

## FLUID INSIDE

All new Fluid Inside™ rotational and liner impact management system is intended to help manage the rotational energy transmitted to the rider's brain in the event of an angled impact and linear energy in the event of a direct impact.

## XT2 LINER®

Removable, washable XT2 comfort liner and cheek pads are antimicrobial and manage odor while wicking moisture away from the head

# MADE FOR MOTOCROSS

Rider needs are always at the forefront when it comes to the design and development of our racewear collection. This year, we rethought the possibilities mobility and durability with our all new Flexair and 360 lines. Rebuilt from the ground up, Flexair puts focus on complete mobility while 360 is the perfect blend of Durability and performance. It's up to you, decide and ride.

# GLOVES

The most important connection with the bike comes through the glove. All riders have their own personal preference for this key contact point. Our collection offers the most comprehensive purpose-built line of gloves in the market. From the complete ballistic full coverage of the Bomber to the slim minimalist Flexair, Fox gloves are made for performance.

# YOUTH

Riding like their idols, youth riders tirelessly emulate every move of the top pros. Whether it's perfecting a scrub or getting that last inch out of a whip, the future stars of our sport have the same product demands as our premier class athletes. Knowing this, we take fit, function and performance for youth riders just as serious as the pros.

#### YTH V2 KRESA HELMET

YS | YM | YL | RRP: R4899.00

- All new Fluid Inside™ is designed to help dissipate rotational and linear energy transmitted to the rider's brain in the event of a crash
- Magnetic Visor Release System (MVRS)™ releases in the event of a crash
- Dual density Varizorb™ EPS liner is meant to provide improved protection by spreading the forces of impact across a wider surface area
- Lightweight Injection molded PC & ABS shell construction disperses energy in the event of a crash
- EPP/PU Chin bar maintains lower weight while helping to manage energy during impact
- Removable, washable XT2® comfort liner and cheek pads are antimicrobial and manage odor while wicking moisture away from the head
- 11 intake and 4 exhaust vents for optimum airflow
- Meets or exceeds ECE 22.05 and/or DOT certifications

# WOMENS

By women for women. After listening to the feedback and inspiration from our female riders, our design and development team meticulously developed purpose-built patterns and designs for females. Blending our vast racewear knowledge with anatomically correct construction takes our MX20 line to a new level of fit, function and performance for all women riders.

# TECHNOLOGY

## HARD GOODS

Rotational and linear impact management system is intended to help manage the rotational energy transmitted to the rider's brain in the event of an angled impact and linear energy in the event of a direct impact.

**MVRS**

Magnetic Visor Release System (MVRS) releases in the event of a crash

**X-static**

X-static® liner inhibits the growth of bacteria, eliminating human based odors.

**DURATAC**

Dual density Varizorb™ EPS liner is meant to provide improved protection by spreading the forces of impact across a wider surface area

**ACTIVELOCK**

Our exclusive Fox Duratac rubber compound provides improved durability and unprecedented grip on outsole and burn guard

**FL**

Patent-pending ActiveLock closure system allows shin to flex with the motion of the boot with fast, easy, and secure closure

**VLS**

VLS (Variable Lens System) design allows transfer of standard and injection molded lens' in the same frame, allowing a versatile range of options from the same goggle.

**TRILOCK**

Impact absorbing Fox F3 Armor provides CE-Level coverage while conforming to your body for a full range of motion

**XT2**

Removable, washable XT2 comfort liner and cheek pads are antimicrobial and manage odor while wicking moisture away from the head

## SOFT GOODS

**CORDURA**

CORDURA® brand fabrics are recognized for their long-lasting durability and resistance to abrasions, tears and scuffs.

**D3O**

D3O® Ce certification insert for impact protection

**Clarino.**

conductive clarino palm for touch screen compatibility.

**TRUMOTION**

TruMotion all-way stretch fabric offers full range of motion increasing mobility

**TRUDRI**

TruDri™ fabrics move sweat away from body to keep you dry

**TRUSEAL**

TruSeal waterproof, breathable, seam-sealed construction locks out the elements

**TRUFEEL**

TruFeel internal silicone fingertip knobs provide heightened sensation and feedback, giving you maximum control of the levers

# SIZING

## A | HEAD

To measure the head circumference, place the tape around the head just about an inch above the eyebrows.

## B | CHEST

To measure the chest circumference, place the tape around the fullest part of the chest, under the arms.

## C | WAIST

To measure the waist circumference, place a tape measure around your bare stomach just above the upper hip bone.

## D | HIP

Measure the circumference about 23cm/9in below the waistline. Stand with feet together.

## E | INSEAM

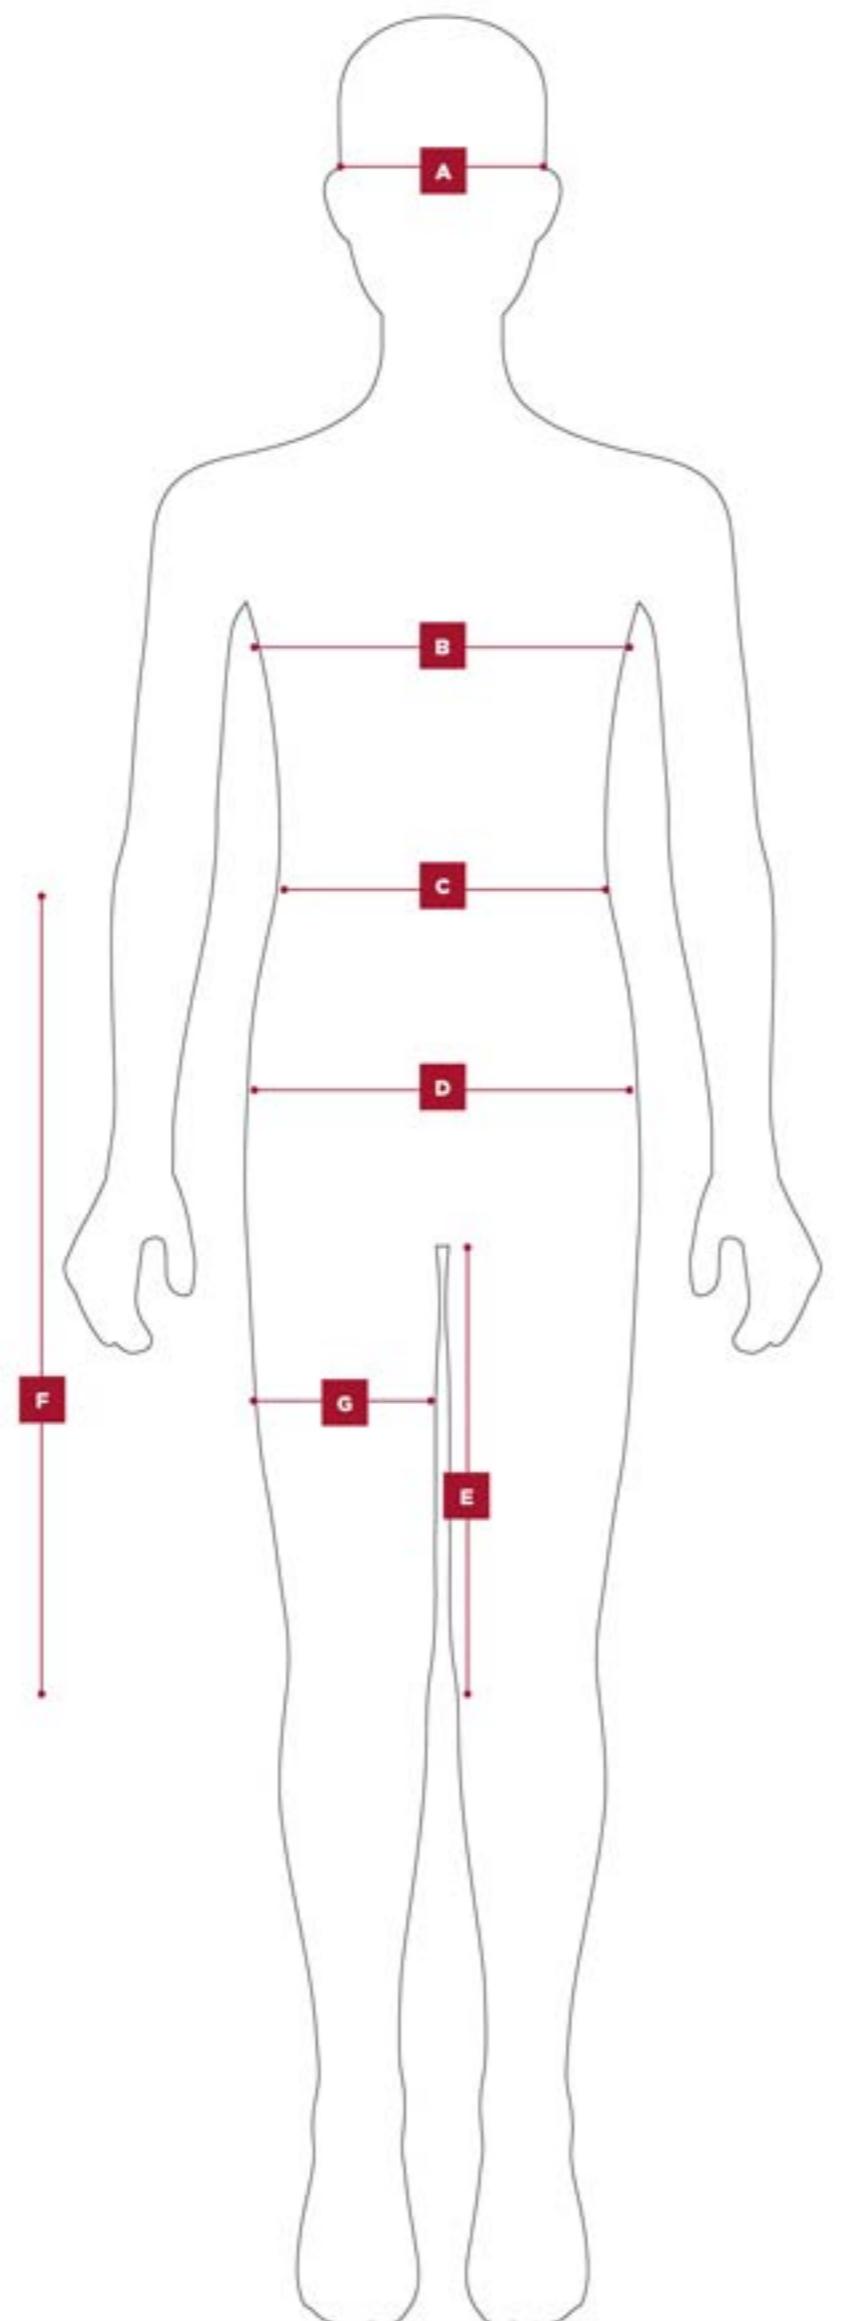

Measure from the crotch to the bottom of the leg (or desired length of hem), running vertically down the inside of the leg.

## F | OUTSEAM

Measure from waistline to the bottom of the leg (or desired length of hem), running vertically down the outside of the leg.

## G | THIGH

To measure the thigh circumference, place the tape around the fullest part of the thigh, below the crotch.
